POLICY ON ENERGY CONSERVATION

It is also decided by the management to replace the old regular lights fittings with LED lights to reduce power consumption and lesser carbon emission. Hence the institute has directed the procurement and administration team to replace the lights as and when the replacement need arises with LED lights all over the campus.

The action is since implemented and is in force. The energy has to be saved not only by changing the lights but also making sure that no electricity leakage is there in the whole campus and proper MCBs are put to control over use of electricity.

As such a full time multi technician to be appointed who will be checking the electrical fitting throughout. Hence a full time Multi Technician has been appointed on roll.

POLICY ON WATER MANAGEMENT

The management realizing the importance of water consumption has decided to adopt following policy:

1. Taps: All the taps through which the water flows to be of taps with aeriated filters. Which helps in reducing the force and flow to the need.
2. All water lines to be kept leak free and replaced from time to time as and when the lines get deteriorated.
3. All the overhead tanks are fitted with auto water controller, which helps the water motors to switch off as soon as the tank is filled to certain level, which helps in stopping the excess water overflow from the overhead tanks.
4. The water is treated –
 1. Bore well water treated through a Water Treatment Plant, and the treated water is supplied throughout the campus for washrooms and other purposes.
 2. The waste water is sent to the Sewage Treatment Plant, where the waste water is treated and used for the toilets flush and for gardening purpose.
 3. For drinking purpose treated water cans are procured and consumed through water dispensers.
 4. For rain water the water is sent for existing bore well re charge and best use is made.

13.05.2022

POLICY ON ALTERNATE SOURCE OF ENERGY

ISME has an electrical sanction load for power usage. As a precautionary step the institute has add additional Diesel Generator, as back up for continuous power supply.

As the campus is also having its Hotel inside the campus, it is mandated to have solar power for hostel to take care of the main requirement of Hot water for all the students throughout the day. The Solar panel as per the policy will be put up on the terrace of the Hostel and Annex combined and the hot water connectivity will be provided to both the boys and girls hostel, which will reduce the burden on the electricity usage and the cost of electricity Bill.

Accordingly the solar panel is erected on the terrace of the Hostel and hot water is connected to the hostel inmates for full time use.

POLICY ON GREEN CAMPUS INTIATIVE

The Management committee has decided to make the ISME campus a green campus. So that the campus wears a pleasant looking.

It is decided to have a lung space within the campus so that free flow of air is there, and during rain, the rain water is absorbed by the ground for helping the ground water. It has been decided to keep an Amphitheater within the campus and plant lots of Trees and plants in and around the campus.

To have a good upkeep of the greenery a full time Gardener and a helper has been appointed to take care of the whole campus greenery. Even it has created lung space in the midst of the main building which keeps the air circulation clean.

13.05.2022

POLICY ON WATER CONSERVATION

Water which is the most precious thing on mother earth has to be used to the minimum. Saving water is not only through not wasting water, it is also through making sure that water taps are functioning properly, no blockages and leakages in the water pipe line.

To ensure that the taps and pipeline works smoothly a full time technician in the campus to be kept. Since then a multi technician is appointed full time. The rain water is being sent to the rain water tank for used for miscellaneous purpose.

To avoid usage of regular water it is also decided to have Sewage treatment Plant, through which all the waste water generated to be treated and the treated water to be used in the Toilet flush of the hostels, and water for gardening purpose with the remaining water.

Since then STP is installed and the same is working fine and the treated water is being used as decided. To do the treatment process Bio Bacteria substance is being used. Even a full time person is kept for regular processing and water evaluating. The STP is being monitored on periodical basis by third party agency.

13.05.2022

POLICY ON PLASTIC USAGE IN THE CAMPUS

The ISME campus is having 2 main academic building and 2 hostels. For the hostellers a full-fledged Kitchen with dining area is provided.

It is kept in mind that the usage of plastic is kept to the minimum. The canteen is strictly advised not to use any plastic glasses or cups for beverages hot or cold. They should be using only paper cups or any bio degradable material substance. Even for serving food the plates and utensils are either stainless steel or porcelain crockery.

A conscious decision is taken to give the gifts and other items to everyone in paper bags of various sizes. No plastic covers to be used, or got for giving away items.

All the floors are provided with dust bins to discard any wrapper used for packed ready food, procured from outside.

To sensitize the people in the campus posters and other notices have been put across the campus.
